## "DE LUXE" KITCHEN UNITS

» » A beautiful Kitchen . . . finished with a flash of color to give it life and cheer . . . every fixture in perfect harmony with the other . . . made of durable wood, built-in, from floor to ceiling, an integral part of the home . . . a place for everything and everything in its place . . . that's the message of F & L "DE LUXE" Kitchen Units.

A message not only for those who are planning to build, but one of equal significance to those who already enjoy a home of their own. In the kitchen, more than in any other part of the house, is reflected the true nature and personality of the housewife. Her first consideration is to keep it clean, orderly and efficient. To keep it clean means the elimination of dirt catchers. To keep it orderly requires suitable storage space for every utensil and food supply. To make it efficient, every feature must be readily accessible.

"DE LUXE" Kitchen Cabinets provide every possible convenience . . . abundant cupboard space, broom and vacuum cleaner cabinets, a built-in ironing board, a breakfast or utility table, sink fronts, metal food containers, cutlery trays, modern work tops and sinks . . . even a compartment for storing of extra dining room table leaves.

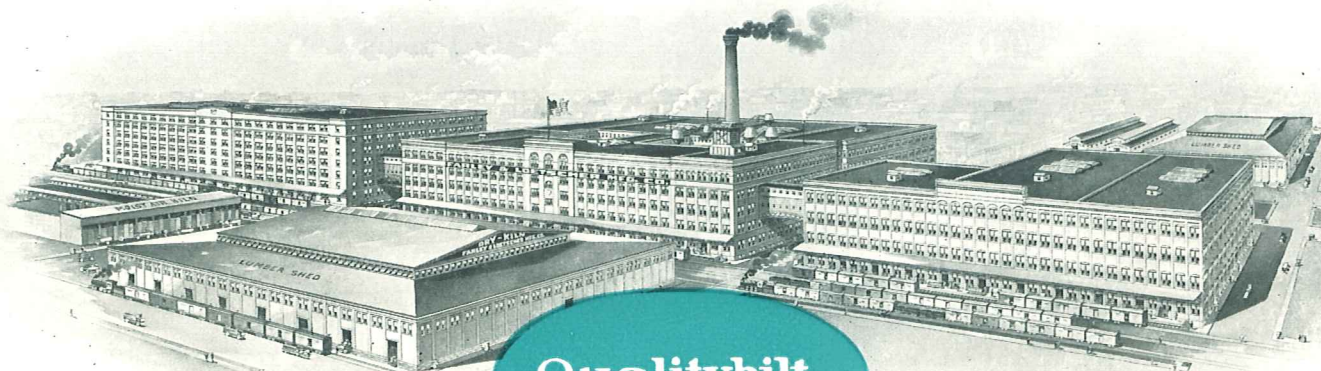

Best of all, "DE LUXE" Kitchen Units are inexpensive . . . really custom-built cabinets at quantity production prices. On the following pages are pictured a few of the many possibilities of F & L "DE LUXE" Cabinets which will serve to give an idea of what can be accomplished in the home. Architects will approve the design and construction . . . housewives will delight in the many conveniences . . . and everyone in the family will be pleased to have the kitchen duties lightened so materially.

Our kitchen planning department now offers a complete service on kitchen planning and is prepared to suggest the latest and best kitchen equipment at the most economical cost.

**WOODWORK**  
REGISTERED

» One of the most popular of De Luxe cabinet installations. Built with window in center, but assembly is just as attractive and as easily arranged with window off center. If there is no window in room end, the use of over-sink section (Page 11) is very effective. The ceiling sections and wood arch make it unnecessary to plaster down to the window for it gives the same delightful appearance and supplies needed additional storage space. Sink top has back and end splashers.

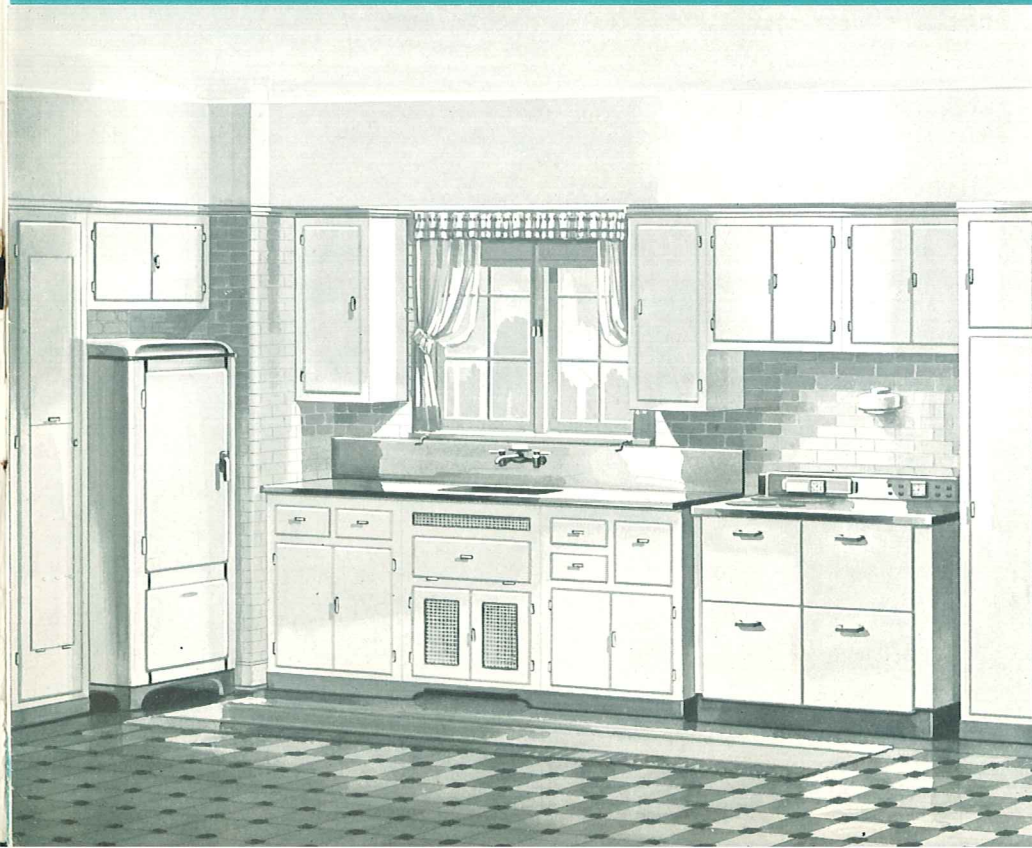

Recommended for room ends 9'-0" to 15'-0".

F & L "DELUXE" INSTALLATION NO. 5000

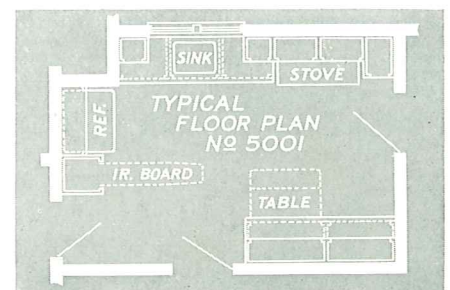

## For Kitchens Old or New

F & L "DELUXE" INSTALLATION NO. 5001

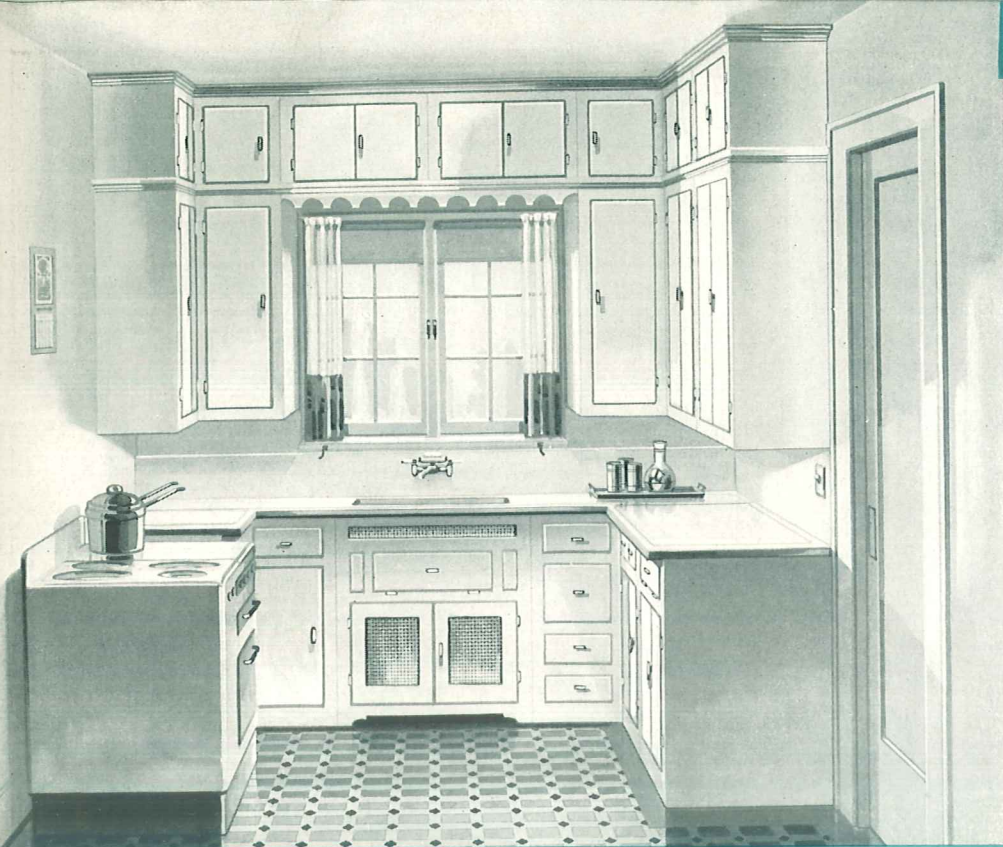

» Here is a kitchen of unusual merit, suggesting a treatment around the corner where two walls can be used and showing how "DELUXE" cabinets completely harmonize with the stove and refrigerator when built around these items. The side unit at the left contains an ironing board, a compartment for brooms, etc., a folding breakfast table, space for extra dining table leaves and extra storage space. Flush type doors used in this layout. Sink top shown with back splasher.

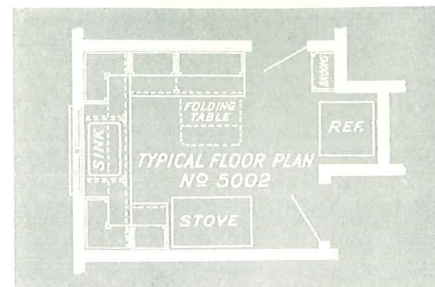

Recommended for kitchens 10'-0" x 14'-0" and larger.

F & L "DE LUXE" INSTALLATION NO. 5002

» A compact three wall arrangement for small kitchens where wall space is limited and maximum storage space is needed. Even the corners and over-the-window spaces are used to good advantage. The folding breakfast table unit No. 5930 along right wall slides out of the way when not in use. The continuous opening over the counter provides liberal working space which is essential in an efficient kitchen. Flush type doors used in this assembly. Top has back splash on sink wall.

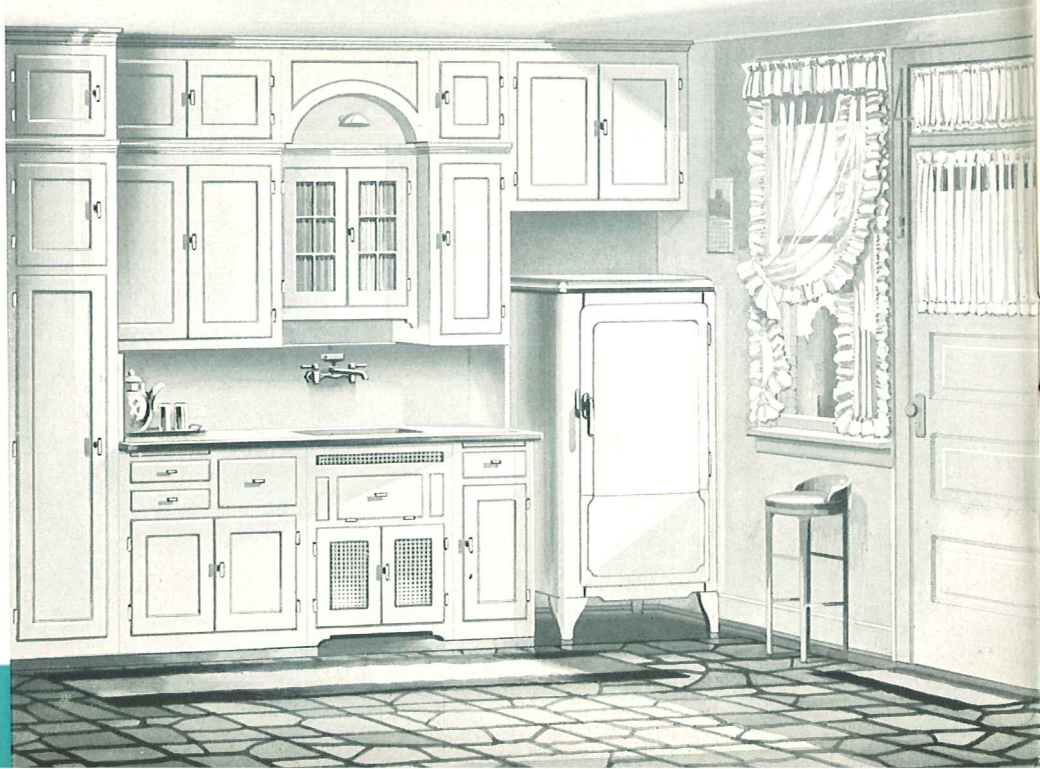

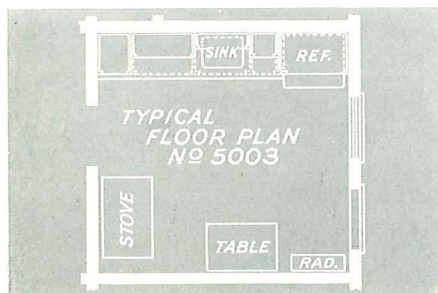

Recommended for kitchens 8'-0" x12'-0" and larger.

## For Kitchens Large or Small

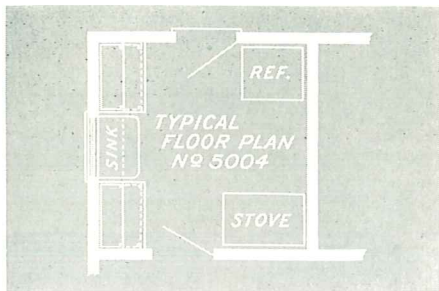

» This installation demonstrates the efficiency of "DE LUXE" Cabinets in producing such a fine arrangement where it was impossible to put a window in the wall and impractical to move the plumbing connections, thus ordinarily making an unbalanced arrangement of cabinets. The shallow wall case over the sink provides a splendid storage for glassware and allows ample freedom around sink. Ceiling cabinet can be substituted for the ceiling arch if more storage space is desired. Sink top shown with back and two end splashers.

Recommended for room ends 9'-0" and larger.

F & L "DE LUXE" INSTALLATION NO. 5003

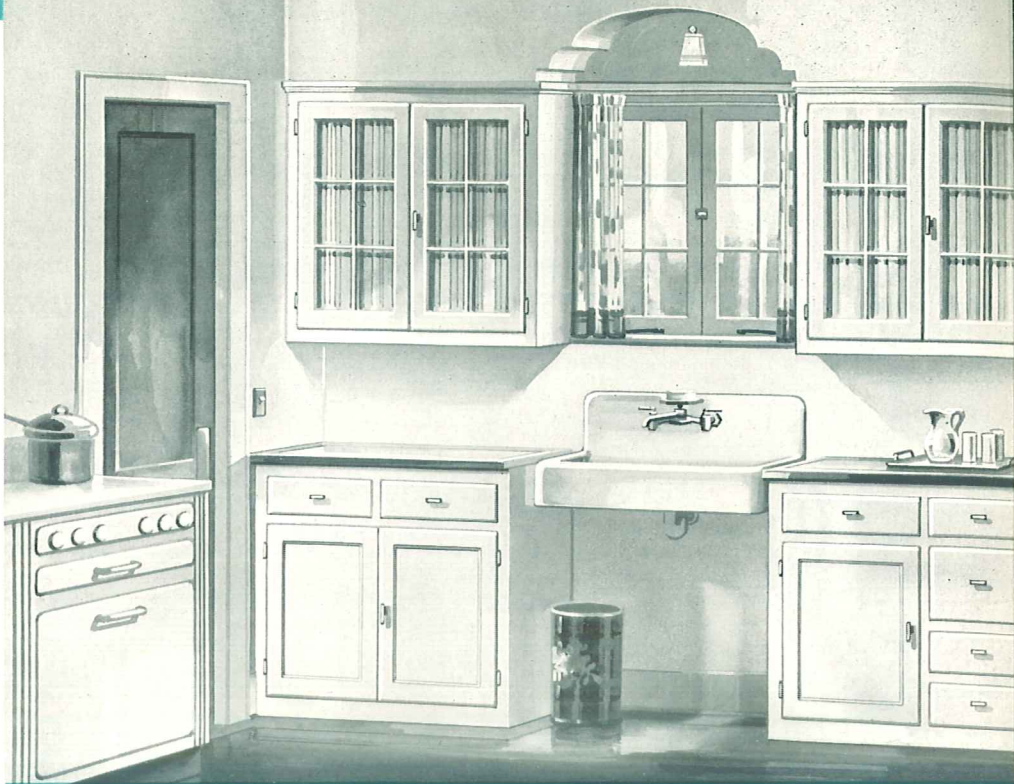

» A popular old stand-by still in use where the sink is an individual unit, particularly for remodeled kitchens. Additional storage space can be easily secured by the use of ceiling units in place of plastering down to window. Wood arch over window gives same effect as plaster arch. Width of cabinets depend on wall space and width of sink. Broom or dish cabinets often used on one or both ends. Six light sash doors shown in wall cases. Paneled or flush-type doors furnished when desired.

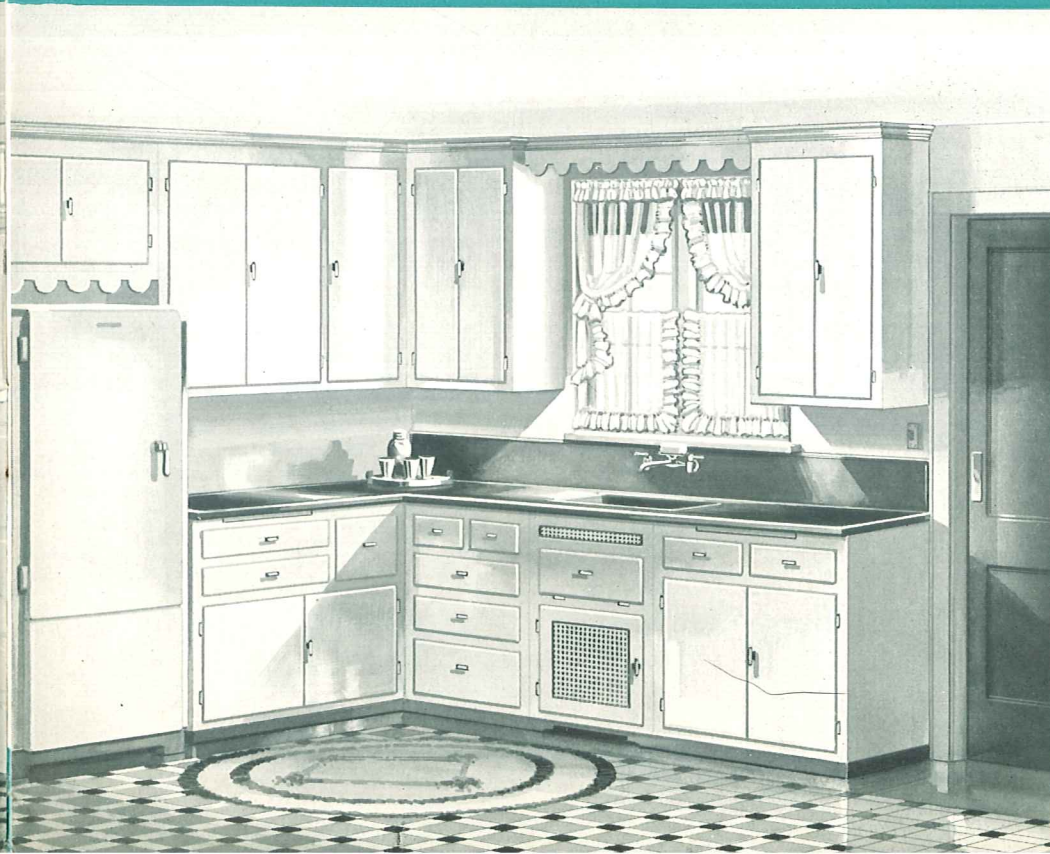

Recommended for room ends 7'-0" and larger.

F & L "DE LUXE" INSTALLATION NO. 5004

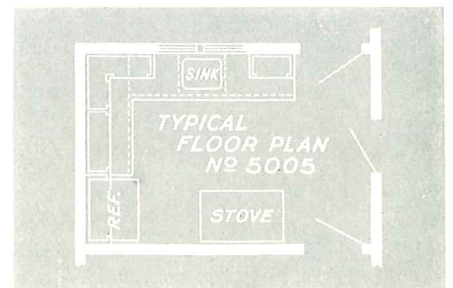

## For High or Low Ceilings

F & L "DE LUXE" INSTALLATION NO. 5005

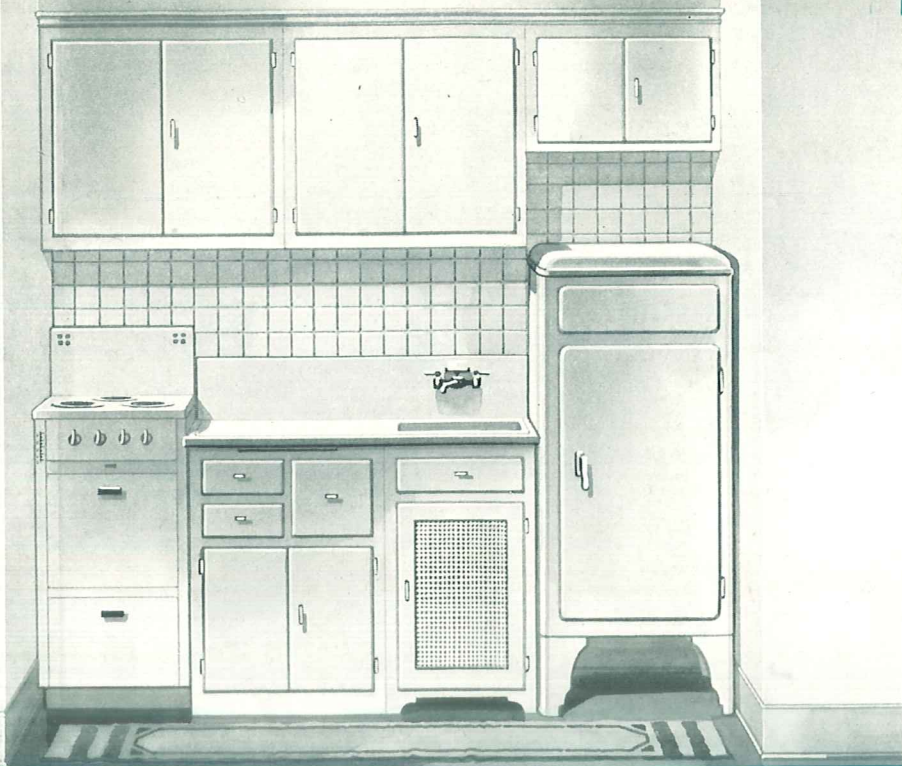

» A suggested grouping of cabinets for small kitchens with low ceilings and where window extends almost to ceiling. Fortunately the window in this installation is placed so as to give a balanced cabinet effect, but an equally efficient layout could be made if the window were not in center. DeLuxe cabinets are made to fit the kitchen under any existing condition. Other apron designs can be furnished for over window or refrigerator if desired. Flush-type doors used in this installation. Back splash used on sink wall.

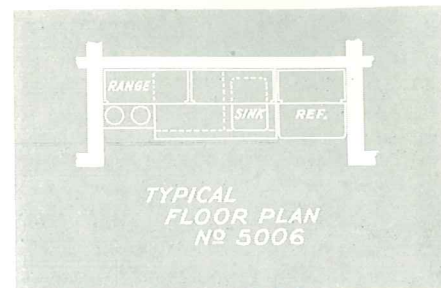

Recommended for kitchens 8'-0" x 11'-6" and larger.

F & L "DE LUXE" INSTALLATION NO. 5006

» F & L "DE LUXE" Kitchen Units are well adapted for the small apartment or hotel kitchenette as demonstrated in this installation. The arrangement has been carefully planned for the use of stock refrigerators and stoves which are usually furnished by local distributors of those items. Top can be furnished with right or left hand sink. Flush-type doors shown in all sections, but paneled doors can be supplied if desired. Assembly can be placed in recess as shown or on wall without recess.

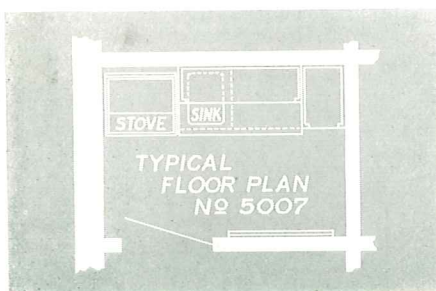

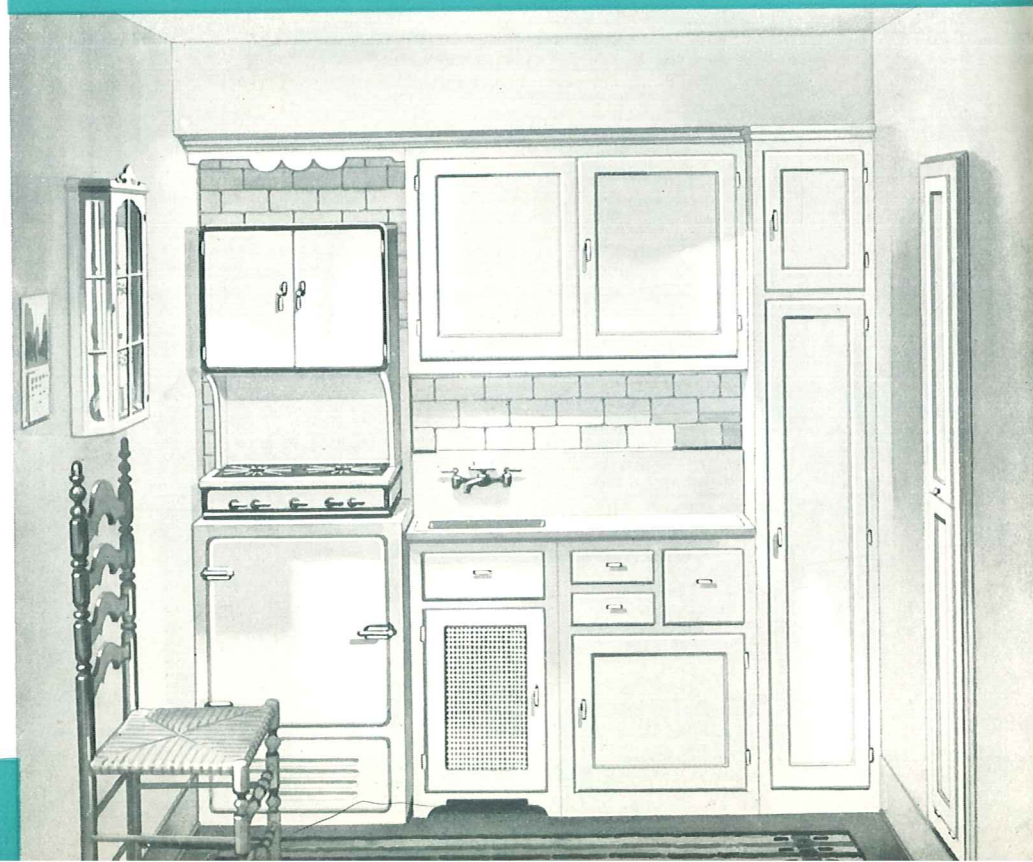

Recommended for room ends 7'-0" and larger.

## For Apartments or Hotels

» Another practical arrangement for a small kitchen, showing the stove directly over the refrigerator, thus permitting the use of a broom or dish unit without taking up extra wall space. Paneled doors are illustrated, but the flush-type or six-light doors can be furnished when ordered. Sink top can be furnished with right or left hand sink. Surface type ironing board No. 6717 is shown attached to right wall. A folding breakfast table unit can be furnished with ironing board when desired.

Recommended for room ends 7'-0" and larger.

Metal food containers and accessories included with units as desired . . Will not contaminate food.

## Counter and Sink Tops

### FLAT TOPS AND SPLASHERS

Designs 6000, 6001, 6002 and 6003 are available in W. P. Pine, selected for grain and color; Plain Birch, selected for grain and color; Farlite; Formica; Linoleum; Tempered Presdwood; Porcelain Enamel; Stainless Steel and Monel Metal.

Tops are usually made 24 inches wide and in various lengths up to 132 inches. Thickness 1" over-all. Splashers any height up to 14 inches.

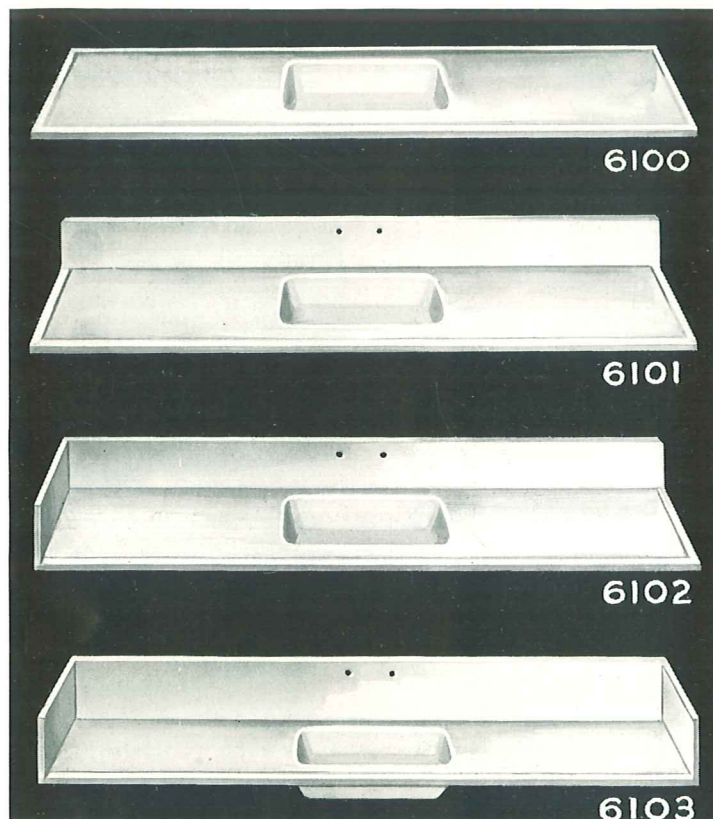

Porcelain Enamel, Stainless Steel or Monel Metal back or end splashers are integral with top . . . all one piece without joints or seams.

Pine, Birch, Farlite, Formica or tempered Presdwood back or end splashers are attached to tops by the use of a special sanitary joint. Linoleum back or end splashers are attached by the use of a special pressure connection.

Individual literature showing the special features of these various type tops will be supplied upon request.

### Flanges

Porcelain, Linoleum, Stainless Steel, and Monel Metal tops are regularly furnished with flanges. W. P. Pine, Birch, or Presdwood tops can be furnished with flanges when desired.

### SINK TOPS AND SPLASHERS

Designs 6100, 6101, 6102 and 6103 include the sink as an integral part of the top in porcelain enamel, stainless steel and Monel Metal. Two sinks furnished when desired. Back and end splashers are also made integral with top and are furnished up to 14 inches high.

Linoleum Sink Tops are furnished with Porcelain Enamel, Stainless Steel or Monel Metal Sinks which are attached to tops by a special sanitary method. Back and end splashers are attached to sink tops by the use of a special pressure connection.

Sink cut-outs may be had in W. P. Pine, Pl. Birch, Farlite, Formica or Presdwood Tops, when flat rim sinks are to be used underneath. Tops are specially prepared for this type construction. Back and end splashers are attached by the use of a special sanitary joint and are furnished any height up to 14 inches.

Individual literature showing the special features of these various type sink tops will be supplied upon request.

### Strainers

Strainer openings are provided for either a regular strainer (2" opening) or any standard dual strainer made for a 4" opening. We can furnish plain strainer No. 6401 or dual strainer No. 6402 when desired.

Stock sizes permit prompt delivery. Stock sizes insure lower costs. Prices quoted on tops of irregular size and construction.

# F & L "De LUXE" KITCHEN UNITS

## General Specifications

**HOW SHIPPED** . . Unless otherwise specified, F & L "De Luxe" Kitchen Units are completely assembled, beautifully decorated and with high grade Chromium Plated Hardware attached. Units include two ends, top (except counter tops), bottom, shelves (as indicated) and backs.

**MATERIAL AND CONSTRUCTION** . . All units are made from thoroughly kiln-dried and seasoned W. P. Pine, selected for grain and color; except hardwood drawer slides and laminated door panels. Three-ply panel stock used in backs. Doors are  $1\frac{1}{16}$ " thick and made with the special F & L "De Luxe" lipped construction. One panel doors furnished unless six-light or flush type doors are specified. Drawers are made with dove-tailed construction.

Front frames, ends and shelves are  $\frac{3}{4}$ " thick. Shelves are adjustable. Doors and front frames are mortised and tenoned and glued. Ends and shelves are made from pieces glued together to resist warping. Paneled ends furnished when specified. All surfaces are smoothly sanded to receive our high grade finish. Material and workmanship of the highest quality.

**FINISHING** . . All surfaces are given a heavy, durable undercoating, and exposed surfaces, both inside and outside of cabinets, are further finished with a special semi-gloss clear tone enamel. Both the undercoat and enamel are synthetic, have strong moisture and alkali resisting properties and produce a fine surface resistance.

**COLORS** . . Standard colors are: Lily white, Pearl glow, Light cream, Jadestone green, Parisian blue, Rose copper orange, Straw yellow and Spanish coral. Mandarin red and Jet black can also be furnished when required. A beautiful decoration furnished on doors of wall or upper sections when specified. Color samples forwarded on request.

Two-color combinations of regular standard colors may be had on exteriors at no extra cost. A small additional charge will be made for special

colors (samples required) or for different colored interior. Cabinets furnished with priming coat only or without primer or enamel when ordered.

**HARDWARE** . . Specially designed hardware is included with all "De Luxe" Sections. The semi-concealed hinges, door catches and drawer pulls are given the approved Chromium-plated finish and are highly rust-resisting. High grade Cadmium-plated elbow catches furnished with pairs of doors. Shelf pins included for adjustable shelves.

**METAL FOOD CONTAINERS** . . The high grade metal food containers shown on page 13 may be included in cabinets at very little extra cost. The material used will not contaminate food and will not crack, flake or peel.

**COUNTER TOPS** . . In addition to the tops shown on page 14, F & L "De Luxe" Cabinets can be prepared for tops of tile, Vitrolite and other materials. Flat rim sinks used with wood, Farlite, Formica or Presdwood tops are usually furnished by local plumbers but can be furnished as a part of the top when desired.

**PACKING** . . F & L "De Luxe" Kitchen Units are well crated for shipment. Extra care is given so each unit will reach destination in first class condition. Tops are also specially crated for shipment.

**SPECIAL CABINETS** . . Although the standard F & L "De Luxe" Units meet the majority of requirements, our factory is fully equipped to produce cabinets of special sizes, special construction such as toe space in lower sections, special cabinets for under enameled iron sinks, and other requirements. Cabinets can also be furnished in various woods.

**OTHER QUALITYBILT PRODUCTS** . . In addition to F & L "De Luxe" Kitchen Units, the Qualitybilt line includes a complete list of home conveniences and everything in woodwork required for the modern home. "UNIPAK" Casements and frames are used in F & L "DE LUXE" installations shown in this catalogue.

## Porcelain Enamel Counter & Sink Tops

Porcelain counter and sink tops are  $\frac{3}{4}$ " thick with 1 $\frac{1}{4}$ " flange. Built of acid-resisting vitreous porcelain on heavy enameling iron, and reinforced by a skeleton wood under-frame. Splashes and sinks are made integral with tops—no joints or seams. Colors available are white, black, ivory, tan, light green, dark green, orchid or gray.

Sink bowls are 12" x 18" (12" parallel to front) in 42" and 48" sink tops (3" from right or left side); 16" x 22" sink bowls (in center—22" parallel to front) in tops 72" to 93"; and 16" x 28" sink bowls (in center—28" parallel to front) in tops 99" and larger. Two faucet holes placed in back splasher over center of sink—8" center to center—6" above plane of top.

Stock size tops are fabricated except for final enameling.

OTHER DESIGNS—Cabinet tops 6001, 6002, 6003 and sink tops 6100, 6103 and other sizes of 6000 and 6101 are made to order. Prices quoted on special sizes, two sink bowls, high splashes and other features. Write for quotations on other designs and sizes.

# PRICE SCHEDULE NO. 1101—F & L "DE LUXE" KITCHEN UNITS

## Stainless Steel Counter and Sink Tops

Stainless Steel counter and sink tops are 1 $\frac{1}{8}$ " thick with 1 $\frac{1}{2}$ " flange. Fabricated from Tampico satin-finish sheets on a wood and steel underframe. Splashes and sinks are integral with top—an all welded construction. Metal is coated underneath with a special sound deadening material. The satin finish has the soft luster of silver.

Sink bowls are 15" x 17 $\frac{1}{2}$ " (17 $\frac{1}{2}$ " parallel to front) in 48" top and 16" x 23 $\frac{1}{2}$ " (23 $\frac{1}{2}$ " parallel to front) in other sizes. Two faucet holes are placed in back splasher over center of sink—8" center to center—6" above plane of top.

OTHER DESIGNS—Other sizes and designs of Monel Metal Cabinet or sink tops are made to order. Write for quotations on other designs and sizes.

## Linoleum Counter and Sink Tops

Linoleum counter and sink tops are 1 $\frac{1}{8}$ " thick with 1 $\frac{1}{2}$ " flange. A special grade of  $\frac{3}{8}$ " linoleum composition is cemented on a steel and wood underframe, with a special Chrome plated edging around entire top. Colors available are Black, Jade green and Applegreen Jaspe'. Back and end splashers are attached to top with an aluminum alloy pressure connection.

A special water-tight connection is provided around edges of sink bowls. 12" x 18" porcelain bowls (12" parallel to front) used in tops up to 66"; 16" x 22" porcelain bowls (22" parallel to front) used in tops 66" to 90"; 16 x 28" porcelain bowls (28" parallel to front) used in tops larger than 96". Faucet holes any position. Sink bowls placed in any position desired.
